Publications - Mark Codner, MD Plastic Surgery

Over the last 2 decades effacement of periorbital hollows (POHs) at the lower eyelid/cheek interface has become a focus of aesthetic eyelid surgeons. 1-3 The common methods by which this has been accomplished include the injection of hyaluronic acid gel (HAG) fillers 4-6 or autologous fat, 2, 3, 7 transposing native eyelid fat, 8-10 midface lifting, 11, 12 or a combination thereof. Reports on these procedures have focused mostly on typical age-related POHs, what we have classified as primary ...
