Clear and Restart the Print Spooler Manually. To clear and restart the print spooler manually, you'll first need to stop the Print Spooler service. Click Start, type "services," and then click the Services app. In the right-hand pane of the Services window, find and double-click the "Print Spooler" service to open its properties window.

How to Cancel or Delete a Stuck Print Job in Windows

I have a case where, if someone hits the "Submit" on a form with blank values, it should ignore the "Submit." No errors. That's easy enough. If someone puts in a partial set of values, and hits "Submit," it should flag some of the fields with errors. If, however, they wipe out those values and hit "Submit" again, it should clear the errors.
