After almost four years of Trump, federal environmental protection is in about the same shape as Western Europe at the end of World War II, filled with bomb craters and destruction. If the election turns out in Biden's favor, he will be faced with the task of rebuilding from the smoking ruins. Here are some ...

Environmental law cannot be treated as international or national; it is both. While environmental concerns have become more and more international in scope during the 20th century, the implementation of international environmental agreements basically remains a matter for national means.

Compatibility Of International And National Environmental Law

International Environmental Law
Introduction. International environmental law is a body of international law concerned with protecting the environment, primarily through bilateral and multilateral international agreements. International environmental law developed as a subset of international law in the mid-twentieth century. Although conservation movements developed in many nations in the nineteenth century, these movements typically only
