### Forerunner 35 - Interval Workouts

True interval training isn't a rushed jog—it's balls out. The central nervous system (CNS) is primarily affected by this high-intensity work and takes a minimum of 48 hours to recover. The late Canadian sprints coach Charlie Francis described the CNS like a cup of tea—everything pours into the cup until things start to overflow.

### High-Intensity Interval Training: The Ultimate Guide ...

Interval training is simply alternating short bursts (about 30 seconds) of intense activity with longer intervals (about 1 to 2 minutes) of less intense activity. For instance, if your exercise is walking and you're in good shape, you might add short bursts of jogging into your regular brisk walks.

### Rev up your workout with interval training - Mayo Clinic

Interval training is a particularly effective way to work out because it keeps the body guessing so that you never get too accustomed to an exercise routine. Interval training is a method of alternating high intensity exercises (85% target heart rate) with lower intensity exercises (70% target heart rate).
