The D 3020 lives up to this promise through a unique implementation of NAD PowerDrive™ developed by Edvardsen, that allows low impedance drive (current) and high dynamic power (voltage) at vanishingly low distortion levels. This refinement of PowerDrive combined with a precision soft clipping circuit, lets the D 3020 sound even more powerful than it already is.

NAD intentionally degraded sound quality little by little in the models that followed the original 3020 namely a,b,e,i,d, etc in order to offer the best in more expensive models. The original 3020 and in particular the floor mounted transformer model is the absolute best sounding one, and most sought after and expensive of course.
