We focus on connection recovery in a single layer. Usually, each sub-network or domain will provide its own recovery functions, such as SONET ring self-healing protection, shared mesh restoration, or dynamic restoration. If a connection travels multiple sub-networks or domains, then the recovery may be either domain-by-domain recovery or end-to-end

network disaster recovery plan: A network disaster recovery plan is a set of procedures designed to prepare an organization to respond to an interruption of network services during a natural or manmade catastrophe.

## **What is network disaster recovery plan? - Definition from ...**

The emergence of MPLS and its extension, MPLambdaS, opens up new possibilities for developing simple integrated protection/restoration schemes that can be coordinated at both the IP and optical layers. However, on the multi-layer network, e.g. IP over WDM with MPLS network, which recovery mechanism is deployed at which layer is
